EXAMINATION	2027 Batch F to A MaxouT Project Theory Revision Exam 05 [English]
QUESTIONS	25 multiple-choice questions
BATCHES	2026 A/L, 2027 A/L, Repeat Batch
STREAMS	Bio Science, Physical Science
REPORT GENERATED	09 October 2026, 03:31 PM

Highlights

TOP PERFORMER	Ishara Rathnayake - 92.0% (23 / 25)
BEST DISTRICT AVERAGE	Ratnapura - 76.0%
HARDEST QUESTION	Q25 - 15.0% answered correctly
WEAKEST SYLLABUS UNIT	Mechanics - 43.2%

Key insights

- 80 students submitted. The average score is 60.7% (median 64.0%); the highest is 92.0% (Ishara Rathnayake) and the lowest is 12.0%.
- 58 of 80 students (72.5%) reached the 50.0% threshold.
- Best district average: Ratnapura (76.0%, 2 students); lowest: Badulla (32.0%, 1 student). Districts with very few students should be read with care.
- Hardest question: Q25 (15.0% correct). Easiest: Q3 (90.0% correct).
- 12 students scored below 35% (grade F) and may need extra support.
- Questions flagged for review: Q12, Q25 (see their pages for the reason).
- Syllabus areas that need attention: Mechanics (43.2%); Modern Physics (55.7%); Optics (62.2%).
- Students used on average 42 min 25 s of the 60 minutes allowed (70.7%).

Score distribution number of students per 10% band

Grade distribution A 75%+ | B 65-74% | C 50-64% | S 35-49% | F below 35%

SECTION 2

Examination Details

How the paper was set up and marked.

EXAMINATION	2027 Batch F to A MaxouT Project Theory Revision Exam 05 [English]
PERIOD	October 2026
PAPER TYPE	Question-by-question (one image per question)
QUESTIONS / OPTIONS	25 questions, 5 options each
DURATION	60 minutes
OPENED	03 October 2026, 03:31 PM
RESULTS	Released to students
ELIGIBLE BATCHES	2026 A/L, 2027 A/L, Repeat Batch
ELIGIBLE STREAMS	Bio Science, Physical Science
ANSWER KEY	Complete (25 / 25)
FREE-MARK QUESTIONS	7
MARKING	1 mark per correct answer, no negative marking
PASS THRESHOLD	50.0% (used for pass rate)
SUBMISSIONS	80 submitted

Instructions given to students

Read each question carefully. Only one answer is correct.

Syllabus coverage questions grouped by the syllabus unit they are tagged to

SYLLABUS UNIT	QUESTIONS	COUNT
Mechanics	Q1, Q13, Q19, Q25	4
Modern Physics	Q6, Q12, Q18, Q24	4
Optics	Q5, Q11, Q17, Q23	4
Thermal Physics	Q4, Q10, Q16, Q22	4
Electricity	Q3, Q9, Q15, Q21	4
Waves	Q2, Q8, Q14, Q20	4

11	Anuradhapura	7	8.8%	12.7	50.9%	22 / 25	3 / 25	57.1%
12	Matale	6	7.5%	12.5	50.0%	16 / 25	6 / 25	66.7%
13	Jaffna	4	5.0%	12.5	50.0%	20 / 25	5 / 25	50.0%
14	Badulla	1	1.3%	8.0	32.0%	8 / 25	8 / 25	0.0%

Districts with no participants (11): Nuwara Eliya, Hambantota, Kilinochchi, Mannar, Vavuniya, Mullaitivu, Ampara, Trincomalee, Puttalam, Polonnaruwa, Monaragala

SECTION 5

Question Analysis Overview

Every question at a glance. Correct % is the share of all submitted students who answered correctly.

Q	CORRECT ANSWERS	CORRECT	DIFFICULTY	DISC.	MOST CHOSEN WRONG	TIME AVG / EXP.
Q1		53.8%	Moderate	0.86	Opt 4 (21.3%)	1:37 / 1:00
Q2		46.3%	Moderate	0.77	Opt 4 (35.0%)	1:38 / 1:00
Q3		90.0%	Easy	0.23	Opt 2 (3.8%)	1:33 / 2:00
Q4		50.0%	Moderate	0.82	Opt 3 (27.5%)	1:22 / 2:30
Q5		83.8%	Easy	0.27	Opt 3 (3.8%)	1:28 / 2:30
Q6		65.0%	Moderate	0.64	Opt 1 (15.0%)	1:36 / 1:30
Q7		100.0%	Free mark	n/a	Opt 4 (25.0%)	1:28 / 2:30
Q8		90.0%	Easy	0.36	Opt 5 (6.3%)	1:31 / 2:30
Q9		57.5%	Moderate	0.77	Opt 3 (28.8%)	1:31 / 3:00
Q10		60.0%	Moderate	0.77	Opt 5 (21.3%)	1:44 / 2:30
Q11		45.0%	Moderate	0.73	Opt 3 (33.8%)	1:36 / 1:30
Q12		52.5%	Moderate	-0.55	Opt 1 (30.0%)	1:35 / 1:00
Q13		38.8%	Difficult	0.73	Opt 2 (41.3%)	1:39 / 2:00
Q14		82.5%	Easy	0.36	Opt 5 (10.0%)	1:35 / 2:30
Q15		58.8%	Moderate	0.55	Opt 2 (25.0%)	1:31 / 1:30
Q16		85.0%	Easy	0.32	Opt 3 (10.0%)	1:33 / 2:30
Q17		82.5%	Easy	0.23	Opt 2 (6.3%)	1:40 / 2:30
Q18		48.8%	Moderate	0.55	Opt 5 (26.3%)	1:34 / 1:00
Q19		65.0%	Moderate	0.68	Opt 5 (17.5%)	1:35 / 1:00
Q20		42.5%	Moderate	0.55	Opt 1 (40.0%)	1:39 / 1:00
Q21		52.5%	Moderate	0.50	Opt 1 (31.3%)	1:33 / 2:00
Q22		58.8%	Moderate	0.68	Opt 4 (16.3%)	1:37 / 3:00
Q23		37.5%	Difficult	0.82	Opt 3 (37.5%)	1:29 / 2:00
Q24		56.3%	Moderate	0.82	Opt 4 (23.8%)	1:39 / 1:00
Q25		15.0%	Difficult	0.32	Opt 5 (53.8%)	1:37 / 2:30

Easy 70% or more Moderate 40-69% Difficult below 40% | Disc. = discrimination index (see appendix)

Five hardest questions

QUESTION	CORRECT	TOP WRONG
Q25	15.0%	Option 5 (53.8%)
Q23	37.5%	Option 3 (37.5%)
Q13	38.8%	Option 2 (41.3%)
Q20	42.5%	Option 1 (40.0%)
Q11	45.0%	Option 3 (33.8%)

Five easiest questions

QUESTION	CORRECT	TOP WRONG
Q3	90.0%	Option 2 (3.8%)
Q8	90.0%	Option 5 (6.3%)
Q16	85.0%	Option 3 (10.0%)
Q5	83.8%	Option 3 (3.8%)
Q14	82.5%	Option 5 (10.0%)

Performance by syllabus unit average correct % of the questions tagged to each unit, weakest first

SYLLABUS UNIT	QUESTIONS	AVERAGE CORRECT	LEVEL
Mechanics	Q1, Q13, Q19, Q25	43.2%	Developing
Modern Physics	Q6, Q12, Q18, Q24	55.7%	Developing
Optics	Q5, Q11, Q17, Q23	62.2%	Developing
Thermal Physics	Q4, Q10, Q16, Q22	63.5%	Developing
Electricity	Q3, Q9, Q15, Q21	64.7%	Developing
Waves	Q2, Q8, Q14, Q20	65.3%	Developing

Question 1 of 25

CORRECT ANSWER

3

Moderate

Disc: Excellent

Weight 5 / 5

Mechanics

- 1) A body of mass 3 kg moves along a smooth horizontal surface under a constant force $F = 20 \text{ N}$. Find its acceleration.

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

Question statistics

Answered correctly	43 of 80 (53.8%)
Attempted	76 (95.0%)
Left blank	4
Most chosen wrong	Option 4 (21.3%)
Top 27% correct	95.5%
Middle correct	55.6%
Bottom 27% correct	9.1%
Discrimination index	0.86 (Excellent)
Average time (m:ss)	1:37 (exp. 1:00)

Insight. 53.8% of students answered correctly, so the question is rated moderate. The most common wrong choice was option 4 (21.3%) - a likely misconception worth revisiting. The top group scored 95.5% against 9.1% for the bottom group (discrimination 0.86). Students spent 1:37 (m:ss) on average against 1:00 expected (slower than expected).

Q2

Question 2 of 25

CORRECT ANSWER

2

Moderate

Disc: Excellent

Weight 5 / 5

Waves / Level 1

Content: Wave properties

Learning outcome: Explains wave properties and solves related numerical problems

2) A progressive wave of frequency 22 Hz travels with a speed of 2 m/s. What is its wavelength?

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	37 of 80 (46.3%)
Attempted	75 (93.8%)
Left blank	5
Most chosen wrong	Option 4 (35.0%)
Top 27% correct	81.8%
Middle correct	50.0%
Bottom 27% correct	4.5%
Discrimination index	0.77 (Excellent)
Average time (m:ss)	1:38 (exp. 1:00)

Insight. 46.3% of students answered correctly, so the question is rated moderate. The most common wrong choice was option 4 (35.0%) - a likely misconception worth revisiting. The top group scored 81.8% against 4.5% for the bottom group (discrimination 0.77). Students spent 1:38 (m:ss) on average against 1:00 expected (slower than expected).

Q3

Question 3 of 25

Easy

Disc: Fair

Weight 5 / 5

CORRECT ANSWER

4

Electricity / Level 1

Content: Current electricity

Learning outcome: Explains current electricity and solves related numerical problems

3) A resistor of 8 ohm is connected across a 25 V battery of negligible internal resistance. The current is:

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	72 of 80 (90.0%)
Attempted	77 (96.3%)
Left blank	3
Most chosen wrong	Option 2 (3.8%)
Top 27% correct	95.5%
Middle correct	97.2%
Bottom 27% correct	72.7%
Discrimination index	0.23 (Fair)
Average time (m:ss)	1:33 (exp. 2:00)

Insight. 90.0% of students answered correctly, so the question is rated easy. The top group scored 95.5% against 72.7% for the bottom group (discrimination 0.23). Students spent 1:33 (m:ss) on average against 2:00 expected (as expected).

Q4

Question 4 of 25

CORRECT ANSWER

1

Moderate

Disc: Excellent

Weight 1 / 5

Thermal Physics / Level 1

Content: Heat transfer

Learning outcome: Explains heat transfer and solves related numerical problems

4) 7 g of water at 20 C receives 13 kJ of heat. Calculate the final temperature ($c = 4.2 \text{ J/g/K}$).

(5 marks)

Thermal Physics

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	40 of 80 (50.0%)
Attempted	74 (92.5%)
Left blank	6
Most chosen wrong	Option 3 (27.5%)
Top 27% correct	90.9%
Middle correct	50.0%
Bottom 27% correct	9.1%
Discrimination index	0.82 (Excellent)
Average time (m:ss)	1:22 (exp. 2:30)

Insight. 50.0% of students answered correctly, so the question is rated moderate. The most common wrong choice was option 3 (27.5%) - a likely misconception worth revisiting. The top group scored 90.9% against 9.1% for the bottom group (discrimination 0.82). Students spent 1:22 (m:ss) on average against 2:30 expected (faster than expected).

Q5

Question 5 of 25

CORRECT ANSWER

1

Easy Disc: Fair Weight 1.5 / 5

Optics / Level 1

Content: Reflection and refraction

Learning outcome: Explains reflection and refraction and solves related numerical problems

- 5) A converging lens of focal length 16 cm forms an image of an object placed 2 cm from the lens. Find the image distance. **(5 marks)**

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

Question statistics

Answered correctly	67 of 80 (83.8%)
Attempted	74 (92.5%)
Left blank	6
Most chosen wrong	Option 3 (3.8%)
Top 27% correct	95.5%
Middle correct	86.1%
Bottom 27% correct	68.2%
Discrimination index	0.27 (Fair)
Average time (m:ss)	1:28 (exp. 2:30)

Insight. 83.8% of students answered correctly, so the question is rated easy. The top group scored 95.5% against 68.2% for the bottom group (discrimination 0.27). Students spent 1:28 (m:ss) on average against 2:30 expected (faster than expected).

Q6

Question 6 of 25

Moderate

Disc: Excellent

Weight 3 / 5

CORRECT ANSWER

5

Modern Physics / Level 1

Content: Atomic structure

Learning outcome: Explains atomic structure and solves related numerical problems

- 6) An electron in a hydrogen atom drops from $n = 5$ to $n = 2$.
The wavelength of the emitted photon is nearest to:

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	52 of 80 (65.0%)
Attempted	72 (90.0%)
Left blank	8
Most chosen wrong	Option 1 (15.0%)
Top 27% correct	90.9%
Middle correct	72.2%
Bottom 27% correct	27.3%
Discrimination index	0.64 (Excellent)
Average time (m:ss)	1:36 (exp. 1:30)

Insight. 65.0% of students answered correctly, so the question is rated moderate. The most common wrong choice was option 1 (15.0%) - a likely misconception worth revisiting. The top group scored 90.9% against 27.3% for the bottom group (discrimination 0.64). Students spent 1:36 (m:ss) on average against 1:30 expected (as expected).

Q7

Question 7 of 25

CORRECT ANSWER

1

Free mark Weight 4 / 5

Mechanics

7) A body of mass 3 kg moves along a smooth horizontal surface under a constant force $F = 13 \text{ N}$. Find its acceleration.

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

Question statistics

Answered correctly	80 of 80 (100.0%)
Attempted	79 (98.8%)
Left blank	1
Most chosen wrong	Option 4 (25.0%)
Top 27% correct	n/a
Middle correct	n/a
Bottom 27% correct	n/a
Discrimination index	n/a (n/a)
Average time (m:ss)	1:28 (exp. 2:30)

Insight. This question was withdrawn by the teacher, so every student received the mark.

Q8

Question 8 of 25

CORRECT ANSWER

3

Easy Disc: Good Weight 5 / 5

Waves / Level 1

Content: Wave properties

Learning outcome: Explains wave properties and solves related numerical problems

8) A progressive wave of frequency 11 Hz travels with a speed of 6 m/s. What is its wavelength?

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	72 of 80 (90.0%)
Attempted	79 (98.8%)
Left blank	1
Most chosen wrong	Option 5 (6.3%)
Top 27% correct	100.0%
Middle correct	100.0%
Bottom 27% correct	63.6%
Discrimination index	0.36 (Good)
Average time (m:ss)	1:31 (exp. 2:30)

Insight. 90.0% of students answered correctly, so the question is rated easy. The top group scored 100.0% against 63.6% for the bottom group (discrimination 0.36). Students spent 1:31 (m:ss) on average against 2:30 expected (faster than expected).

Question 9 of 25

Moderate

Disc: Excellent

Weight 4 / 5

CORRECT ANSWER

5

Electricity / Level 1

Content: Current electricity

Learning outcome: Explains current electricity and solves related numerical problems

9) A resistor of 6 ohm is connected across a 29 V battery of negligible internal resistance. The current is:

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	46 of 80 (57.5%)
Attempted	79 (98.8%)
Left blank	1
Most chosen wrong	Option 3 (28.8%)
Top 27% correct	86.4%
Middle correct	69.4%
Bottom 27% correct	9.1%
Discrimination index	0.77 (Excellent)
Average time (m:ss)	1:31 (exp. 3:00)

Insight. 57.5% of students answered correctly, so the question is rated moderate. The most common wrong choice was option 3 (28.8%) - a likely misconception worth revisiting. The top group scored 86.4% against 9.1% for the bottom group (discrimination 0.77). Students spent 1:31 (m:ss) on average against 3:00 expected (faster than expected).

Q10

Question 10 of 25

CORRECT ANSWER

1

Moderate

Disc: Excellent

Weight 3.5 / 5

Thermal Physics / Level 1

Content: Heat transfer

Learning outcome: Explains heat transfer and solves related numerical problems

10) 5 g of water at 20 C receives 12 kJ of heat. Calculate the final temperature ($c = 4.2 \text{ J/g/K}$).

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	48 of 80 (60.0%)
Attempted	74 (92.5%)
Left blank	6
Most chosen wrong	Option 5 (21.3%)
Top 27% correct	95.5%
Middle correct	63.9%
Bottom 27% correct	18.2%
Discrimination index	0.77 (Excellent)
Average time (m:ss)	1:44 (exp. 2:30)

Insight. 60.0% of students answered correctly, so the question is rated moderate. The most common wrong choice was option 5 (21.3%) - a likely misconception worth revisiting. The top group scored 95.5% against 18.2% for the bottom group (discrimination 0.77). Students spent 1:44 (m:ss) on average against 2:30 expected (faster than expected).

Q11

Question 11 of 25

CORRECT ANSWER

5

Moderate

Disc: Excellent

Weight 1.5 / 5

Optics / Level 1

Content: Reflection and refraction

Learning outcome: Explains reflection and refraction and solves related numerical problems

11) A converging lens of focal length 17 cm forms an image of an object placed 4 cm from the lens. Find the image distance.

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	36 of 80 (45.0%)
Attempted	76 (95.0%)
Left blank	4
Most chosen wrong	Option 3 (33.8%)
Top 27% correct	72.7%
Middle correct	55.6%
Bottom 27% correct	0.0%
Discrimination index	0.73 (Excellent)
Average time (m:ss)	1:36 (exp. 1:30)

Insight. 45.0% of students answered correctly, so the question is rated moderate. The most common wrong choice was option 3 (33.8%) - a likely misconception worth revisiting. The top group scored 72.7% against 0.0% for the bottom group (discrimination 0.73). Students spent 1:36 (m:ss) on average against 1:30 expected (as expected).

Q12

Question 12 of 25

CORRECT ANSWER

2

Moderate

Disc: Negative

Weight 2.5 / 5

Modern Physics / Level 1

Content: Atomic structure

Learning outcome: Explains atomic structure and solves related numerical problems

12) An electron in a hydrogen atom drops from $n = 9$ to $n = 2$.
The wavelength of the emitted photon is nearest to:

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	42 of 80 (52.5%)
Attempted	75 (93.8%)
Left blank	5
Most chosen wrong	Option 1 (30.0%)
Top 27% correct	27.3%
Middle correct	50.0%
Bottom 27% correct	81.8%
Discrimination index	-0.55 (Negative)
Average time (m:ss)	1:35 (exp. 1:00)

Insight. 52.5% of students answered correctly, so the question is rated moderate. The most common wrong choice was option 1 (30.0%) - a likely misconception worth revisiting. The top group scored 27.3% against 81.8% for the bottom group (discrimination -0.55). Students spent 1:35 (m:ss) on average against 1:00 expected (slower than expected).

Review: stronger students scored lower than weaker students on this question - check the answer key and wording.

Q13

Question 13 of 25

CORRECT ANSWER

1

Difficult

Disc: Excellent

Weight 2 / 5

Mechanics

13) A body of mass 6 kg moves along a smooth horizontal surface under a constant force $F = 3 \text{ N}$. Find its acceleration.

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

Question statistics

Answered correctly	31 of 80 (38.8%)
Attempted	78 (97.5%)
Left blank	2
Most chosen wrong	Option 2 (41.3%)
Top 27% correct	81.8%
Middle correct	30.6%
Bottom 27% correct	9.1%
Discrimination index	0.73 (Excellent)
Average time (m:ss)	1:39 (exp. 2:00)

Insight. 38.8% of students answered correctly, so the question is rated difficult. The most common wrong choice was option 2 (41.3%) - a likely misconception worth revisiting. The top group scored 81.8% against 9.1% for the bottom group (discrimination 0.73). Students spent 1:39 (m:ss) on average against 2:00 expected (as expected).

Q14

Question 14 of 25

CORRECT ANSWER

1

Easy Disc: Good Weight 2 / 5

Waves / Level 1

Content: Wave properties

Learning outcome: Explains wave properties and solves related numerical problems

14) A progressive wave of frequency 39 Hz travels with a speed of 7 m/s. What is its wavelength?

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	66 of 80 (82.5%)
Attempted	79 (98.8%)
Left blank	1
Most chosen wrong	Option 5 (10.0%)
Top 27% correct	100.0%
Middle correct	83.3%
Bottom 27% correct	63.6%
Discrimination index	0.36 (Good)
Average time (m:ss)	1:35 (exp. 2:30)

Insight. 82.5% of students answered correctly, so the question is rated easy. The top group scored 100.0% against 63.6% for the bottom group (discrimination 0.36). Students spent 1:35 (m:ss) on average against 2:30 expected (faster than expected).

Q15

Question 15 of 25

CORRECT ANSWER

4

Moderate

Disc: Excellent

Weight 3.5 / 5

Electricity / Level 1

Content: Current electricity

Learning outcome: Explains current electricity and solves related numerical problems

15) A resistor of 2 ohm is connected across a 32 V battery of negligible internal resistance. The current is:

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	47 of 80 (58.8%)
Attempted	73 (91.3%)
Left blank	7
Most chosen wrong	Option 2 (25.0%)
Top 27% correct	77.3%
Middle correct	69.4%
Bottom 27% correct	22.7%
Discrimination index	0.55 (Excellent)
Average time (m:ss)	1:31 (exp. 1:30)

Insight. 58.8% of students answered correctly, so the question is rated moderate. The most common wrong choice was option 2 (25.0%) - a likely misconception worth revisiting. The top group scored 77.3% against 22.7% for the bottom group (discrimination 0.55). Students spent 1:31 (m:ss) on average against 1:30 expected (as expected).

Q16

Question 16 of 25

Easy Disc: Good Weight 4 / 5

CORRECT ANSWER

4

Thermal Physics / Level 1

Content: Heat transfer

Learning outcome: Explains heat transfer and solves related numerical problems

16) 8 g of water at 20 C receives 28 kJ of heat. Calculate the final temperature ($c = 4.2 \text{ J/g/K}$).

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	68 of 80 (85.0%)
Attempted	78 (97.5%)
Left blank	2
Most chosen wrong	Option 3 (10.0%)
Top 27% correct	95.5%
Middle correct	91.7%
Bottom 27% correct	63.6%
Discrimination index	0.32 (Good)
Average time (m:ss)	1:33 (exp. 2:30)

Insight. 85.0% of students answered correctly, so the question is rated easy. The top group scored 95.5% against 63.6% for the bottom group (discrimination 0.32). Students spent 1:33 (m:ss) on average against 2:30 expected (faster than expected).

Q17

Question 17 of 25

CORRECT ANSWER

1

Easy

Disc: Fair

Weight 1.5 / 5

Optics / Level 1

Content: Reflection and refraction

Learning outcome: Explains reflection and refraction and solves related numerical problems

17) A converging lens of focal length 6 cm forms an image of an object placed 8 cm from the lens. Find the image distance.

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

Question statistics

Answered correctly	66 of 80 (82.5%)
Attempted	75 (93.8%)
Left blank	5
Most chosen wrong	Option 2 (6.3%)
Top 27% correct	86.4%
Middle correct	91.7%
Bottom 27% correct	63.6%
Discrimination index	0.23 (Fair)
Average time (m:ss)	1:40 (exp. 2:30)

Insight. 82.5% of students answered correctly, so the question is rated easy. The top group scored 86.4% against 63.6% for the bottom group (discrimination 0.23). Students spent 1:40 (m:ss) on average against 2:30 expected (faster than expected).

Q18

Question 18 of 25

CORRECT ANSWER

2

Moderate

Disc: Excellent

Weight 2.5 / 5

Modern Physics / Level 1

Content: Atomic structure

Learning outcome: Explains atomic structure and solves related numerical problems

18) An electron in a hydrogen atom drops from $n = 5$ to $n = 2$.
The wavelength of the emitted photon is nearest to:

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	39 of 80 (48.8%)
Attempted	77 (96.3%)
Left blank	3
Most chosen wrong	Option 5 (26.3%)
Top 27% correct	59.1%
Middle correct	69.4%
Bottom 27% correct	4.5%
Discrimination index	0.55 (Excellent)
Average time (m:ss)	1:34 (exp. 1:00)

Insight. 48.8% of students answered correctly, so the question is rated moderate. The most common wrong choice was option 5 (26.3%) - a likely misconception worth revisiting. The top group scored 59.1% against 4.5% for the bottom group (discrimination 0.55). Students spent 1:34 (m:ss) on average against 1:00 expected (slower than expected).

Q19

Question 19 of 25

CORRECT ANSWER

1

Moderate

Disc: Excellent

Weight 2 / 5

Mechanics

19) A body of mass 7 kg moves along a smooth horizontal surface under a constant force $F = 6 \text{ N}$. Find its acceleration.

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

Question statistics

Answered correctly	52 of 80 (65.0%)
Attempted	77 (96.3%)
Left blank	3
Most chosen wrong	Option 5 (17.5%)
Top 27% correct	95.5%
Middle correct	69.4%
Bottom 27% correct	27.3%
Discrimination index	0.68 (Excellent)
Average time (m:ss)	1:35 (exp. 1:00)

Insight. 65.0% of students answered correctly, so the question is rated moderate. The most common wrong choice was option 5 (17.5%) - a likely misconception worth revisiting. The top group scored 95.5% against 27.3% for the bottom group (discrimination 0.68). Students spent 1:35 (m:ss) on average against 1:00 expected (slower than expected).

Q20

Question 20 of 25

CORRECT ANSWER

5

Moderate

Disc: Excellent

Weight 1.5 / 5

Waves / Level 1

Content: Wave properties

Learning outcome: Explains wave properties and solves related numerical problems

20) A progressive wave of frequency 37 Hz travels with a speed of 4 m/s. What is its wavelength?

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	34 of 80 (42.5%)
Attempted	77 (96.3%)
Left blank	3
Most chosen wrong	Option 1 (40.0%)
Top 27% correct	68.2%
Middle correct	44.4%
Bottom 27% correct	13.6%
Discrimination index	0.55 (Excellent)
Average time (m:ss)	1:39 (exp. 1:00)

Insight. 42.5% of students answered correctly, so the question is rated moderate. The most common wrong choice was option 1 (40.0%) - a likely misconception worth revisiting. The top group scored 68.2% against 13.6% for the bottom group (discrimination 0.55). Students spent 1:39 (m:ss) on average against 1:00 expected (slower than expected).

Q21

Question 21 of 25

CORRECT ANSWER

4

Moderate

Disc: Excellent

Weight 1.5 / 5

Electricity / Level 1

Content: Current electricity

Learning outcome: Explains current electricity and solves related numerical problems

21) A resistor of 2 ohm is connected across a 7 V battery of negligible internal resistance. The current is:

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	42 of 80 (52.5%)
Attempted	77 (96.3%)
Left blank	3
Most chosen wrong	Option 1 (31.3%)
Top 27% correct	81.8%
Middle correct	47.2%
Bottom 27% correct	31.8%
Discrimination index	0.50 (Excellent)
Average time (m:ss)	1:33 (exp. 2:00)

Insight. 52.5% of students answered correctly, so the question is rated moderate. The most common wrong choice was option 1 (31.3%) - a likely misconception worth revisiting. The top group scored 81.8% against 31.8% for the bottom group (discrimination 0.50). Students spent 1:33 (m:ss) on average against 2:00 expected (as expected).

Q22

Question 22 of 25

CORRECT ANSWER

1

Moderate

Disc: Excellent

Weight 2.5 / 5

Thermal Physics / Level 1

Content: Heat transfer

Learning outcome: Explains heat transfer and solves related numerical problems

22) 8 g of water at 20 C receives 12 kJ of heat. Calculate the final temperature ($c = 4.2 \text{ J/g/K}$).

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	47 of 80 (58.8%)
Attempted	75 (93.8%)
Left blank	5
Most chosen wrong	Option 4 (16.3%)
Top 27% correct	86.4%
Middle correct	66.7%
Bottom 27% correct	18.2%
Discrimination index	0.68 (Excellent)
Average time (m:ss)	1:37 (exp. 3:00)

Insight. 58.8% of students answered correctly, so the question is rated moderate. The most common wrong choice was option 4 (16.3%) - a likely misconception worth revisiting. The top group scored 86.4% against 18.2% for the bottom group (discrimination 0.68). Students spent 1:37 (m:ss) on average against 3:00 expected (faster than expected).

Q23

Question 23 of 25

CORRECT ANSWER

5

Difficult **Disc: Excellent** Weight 3 / 5

Optics / Level 1

Content: Reflection and refraction

Learning outcome: Explains reflection and refraction and solves related numerical problems

23) A converging lens of focal length 33 cm forms an image of an object placed 7 cm from the lens. Find the image distance.

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	30 of 80 (37.5%)
Attempted	76 (95.0%)
Left blank	4
Most chosen wrong	Option 3 (37.5%)
Top 27% correct	81.8%
Middle correct	33.3%
Bottom 27% correct	0.0%
Discrimination index	0.82 (Excellent)
Average time (m:ss)	1:29 (exp. 2:00)

Insight. 37.5% of students answered correctly, so the question is rated difficult. The most common wrong choice was option 3 (37.5%) - a likely misconception worth revisiting. The top group scored 81.8% against 0.0% for the bottom group (discrimination 0.82). Students spent 1:29 (m:ss) on average against 2:00 expected (faster than expected).

Q24

Question 24 of 25

CORRECT ANSWER

1

Moderate

Disc: Excellent

Weight 1.5 / 5

Modern Physics / Level 1

Content: Atomic structure

Learning outcome: Explains atomic structure and solves related numerical problems

24) An electron in a hydrogen atom drops from $n = 9$ to $n = 2$.
The wavelength of the emitted photon is nearest to:

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	45 of 80 (56.3%)
Attempted	79 (98.8%)
Left blank	1
Most chosen wrong	Option 4 (23.8%)
Top 27% correct	90.9%
Middle correct	63.9%
Bottom 27% correct	9.1%
Discrimination index	0.82 (Excellent)
Average time (m:ss)	1:39 (exp. 1:00)

Insight. 56.3% of students answered correctly, so the question is rated moderate. The most common wrong choice was option 4 (23.8%) - a likely misconception worth revisiting. The top group scored 90.9% against 9.1% for the bottom group (discrimination 0.82). Students spent 1:39 (m:ss) on average against 1:00 expected (slower than expected).

Q25

Question 25 of 25

CORRECT ANSWER

2

Difficult

Disc: Good

Weight 5 / 5

Mechanics

25) A body of mass 6 kg moves along a smooth horizontal surface under a constant force $F = 8 \text{ N}$. Find its acceleration.

(5 marks)

(1) answer A

(2) answer B

(3) answer C

(4) answer D

(5) answer E

Answer distribution

● correct answer ● most chosen wrong ● left blank

Question statistics

Answered correctly	12 of 80 (15.0%)
Attempted	76 (95.0%)
Left blank	4
Most chosen wrong	Option 5 (53.8%)
Top 27% correct	36.4%
Middle correct	8.3%
Bottom 27% correct	4.5%
Discrimination index	0.32 (Good)
Average time (m:ss)	1:37 (exp. 2:30)

Insight. 15.0% of students answered correctly, so the question is rated difficult. The most common wrong choice was option 5 (53.8%) - a likely misconception worth revisiting. The top group scored 36.4% against 4.5% for the bottom group (discrimination 0.32). Students spent 1:37 (m:ss) on average against 2:30 expected (faster than expected).

Review: option 5 was chosen more than the keyed answer - confirm the key.

SECTION 7

Student Ranking

80 students ranked by marks. Equal marks share the same rank; ties are listed fastest first.

RANK	STUDENT	REG. ID	DISTRICT	BATCH	MARKS	%	GRADE	TIME

SECTION 8

Appendix: Definitions & Method

How the figures in this report are calculated.

MARKS	One mark per correct answer; no negative marking. Questions the teacher marked as <i>free mark</i> count as correct for every student. Marks are recalculated from the current answer key when this report is generated.
PERCENTAGE	Marks divided by the number of questions, times 100.
PASS RATE	Share of students scoring 50% or more.
GRADES	A: 75% and above. B: 65-74%. C: 50-64%. S: 35-49%. F: below 35%.
MEAN, MEDIAN, STD DEV	Mean is the average percentage. Median is the middle student. Standard deviation shows how spread out the scores are (population formula).
CORRECT %	Students who answered the question correctly divided by all students who submitted the paper (blank answers count as not correct).
DIFFICULTY	Easy: 70% or more answered correctly. Moderate: 40-69%. Difficult: below 40%.
DISCRIMINATION INDEX	Correct share of the top 27% of students (by total marks) minus that of the bottom 27%. 0.40 and above is excellent, 0.30-0.39 good, 0.20-0.29 fair, below 0.20 poor, and a negative value means weaker students did better than stronger ones - check the answer key. It needs at least 10 submissions.
MOST CHOSEN WRONG	The wrong option picked by the most students - useful for spotting a common misconception.
AVERAGE TIME	Mean time students spent viewing the question (question-by-question exams only), compared with the expected time set by the teacher.
SYLLABUS UNITS	Questions are grouped by the syllabus units tagged in the Question Editor; the unit score is the average Correct % of its questions.
DISTRICT	The district each student entered in their details form.
